

## WELLNESS SCREENS

### WSH HORIZONTAL FREESTANDING PROTECTIVE SCREEN

Wellness screens, also known as sneeze guards, assemble in seconds, sliding into varying base options with little to no hardware required. Available with or without pass-through slots, the screens are an effective physical barrier against COVID-19. Corners are rounded for added safety. Securing bases to tabletops or desks is also an option using double-face tape, screws or clamps.

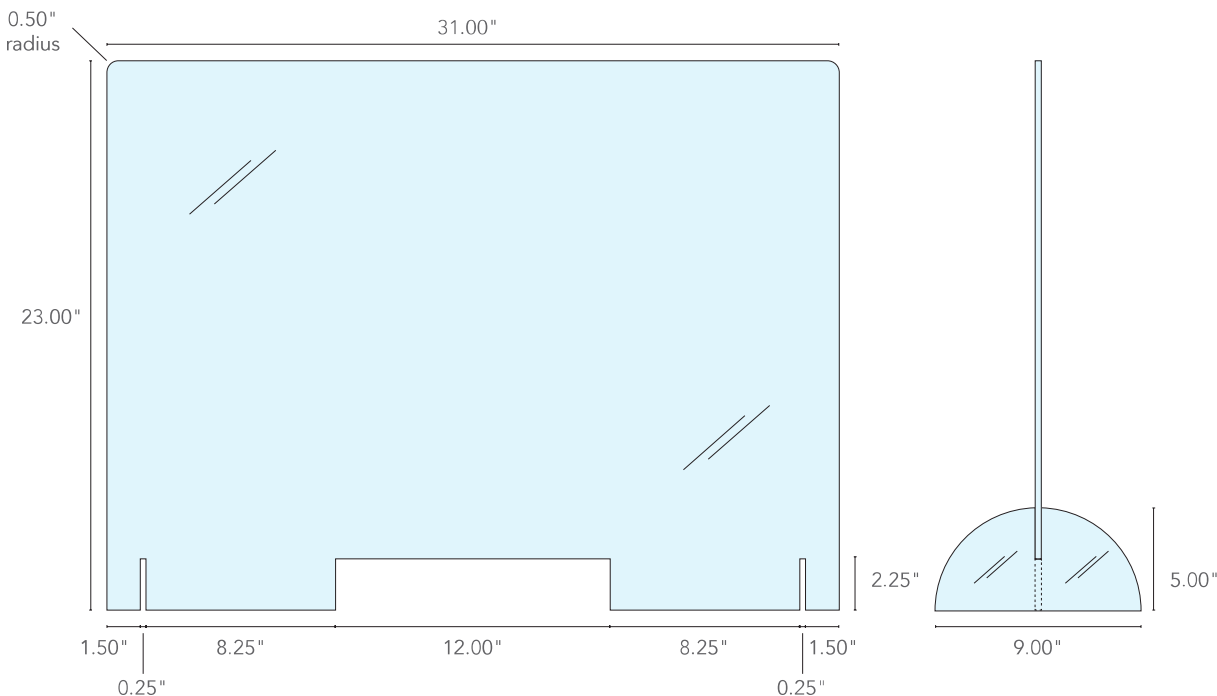

### SPECIFICATIONS

- 31.00" wide x 23.00" high\* with 0.50" radius rounded corners
- Available with or without a pass-through slot
- Available in 1/8" or 1/4" thick clear acrylic
- Acrylic feet available in clear, white, or black

### **\$130 per screen**

*Size is based on maximizing the number of screens that can be cut out of a full sheet of clear acrylic and eliminating waste on this high-demand product.*

*This product is in high demand. A high volume of orders may result in delays due to restocking.*

## SHAPED WELLNESS SCREENS

### SHAPED WSH HORIZONTAL FREESTANDING PROTECTIVE SCREEN

The customization of screens is also available by size and mounting method as well as the acrylic thickness. Additionally, depending on the size of the screen, logos and/or privacy graphics can be etched into the acrylic. For further integration into the environment's interior design, consider a shaped edge on the wellness screens.
